Professional experiences

Dates 09/2022-today
Occupation and covered position Data scientist

Main activities extract, analyse and interpret large amounts of data from a range of sources, using algorithmic, data mining, artificial intelligence, machine learning and statistical tools. Writing scientific articles in Peer Reviewed journals.

Name and address of employer IRCCS Saverio De Bellis, Castellana Grotte.

Dates 09/2006 – 09/2022
Occupation and covered position Biostatistician

Main activities	Design and analysis of observational and experimental studies. Writing scientific articles for publication and advanced consulting in Biostatistics. production of tables, listings and figures, data review and statistical analysis.
Name and address of employer	IRCCS Centro Cardiologico Monzino, Milano.
Dates	06/2004 – 09/2004
Occupation and covered position	Statistical Researcher
Main activities and responsibilities	Meteorological and Hydrological service - forecasting and modelling the atmospheric variables, mainly ozone and PM10. ARIMA models for historical data interpretation.
Name and address of employer	Agenzia regionale protezione ambiente A.R.P.A Bologna
Education and training	
Dates	04/2019
Title of qualification awarded	Master: Machine learning and big data in precision medicine and biomedical research.
Principal subjects/occupational skills covered	Supervised Learning: Naïve Bayes, Lasso-Ridge-ElasticNet regression, Bayesian Networks, Neural Networks, Support Vector Machine, Decision trees, Random Forest. Unsupervised Learning: Clustering methods, principal components, Non-negative Matrix factorization, Self-Organizing Maps.
Name and type of organisation providing education and training	Università degli studi di Padova.
Dates	04/2007
Title of qualification awarded	Master of science (MSc) in Biostatistics and experimental statistics.
Principal subjects/occupational skills covered	Mathematical and statistical theories for medical and biological practices, public health and epidemiology. Design and analysis of experiments: analysis of variance and covariance, factorial designs. Multivariate Statistics: linear and logistic regression, cluster analysis, factor analysis and principal component analysis. Survival analysis: Kaplan Meier estimate, multivariate Cox regression, frailty models. Quantitative Genetics: frequency and balance of genotypes, variance components and heritability.
Name and type of organisation providing education and training	Facoltà di Scienze Statistiche - Università di Milano – Bicocca.

Level in national or international classification	101/110																								
Dates	12/2004																								
Title of qualification awarded	Bachelor's degree in statistical populations and environmental statistics.																								
Principal subjects/occupational skills covered	Analysis of the structural and dynamic aspects of populations, understanding the interactions between the various demographic phenomena. Spatial analysis of geostatistical data.																								
Name and type of organisation providing education and training	Facoltà di Scienze Statistiche - Università di Bologna.																								
Level in national or international classification	102/110																								
Dates	07/1999																								
Title of qualification awarded	surveyor.																								
Principal subjects/occupational skills covered																									
Name and type of organisation providing education and training	I.T.G "F.Brunelleschi" - Agrigento.

Social skills and competences	Excellent skills in team collaboration, interaction with different professionals for problem solving.																								

Organisational skills and competences	Ability to construct projects and fix objectives, to manage time effectively and efficiently,to organize meetings and solve problems in a timely manner.
Computer skills and competences	ECDL Diploma (European Computer Driving Licence) for Office program (word, excel, power point, access, internet). Excellent knowledge of statistical programs: R software environment; SAS advanced (macro language, ODS language, IML) with development of SAS macro programs helpful to reduce considerably the time of analysis and to obtain a perfect data quality control (short examples ^{a)} .Academic experience in Stata.
Other skills and competences	Course and profession of Football Referee during 1998-99 at the AIA section of Agrigento. Private lessons in mathematics and geometry to Secondary School students during the years 2002-2004.
Driving licence	Patente B
Additional information	Military service performed at Navy of Pesaro as navy boatswain from april 2001 to april 2002

- a 1) a macro program that finds interactions in multiple linear regression. Given n predictors that predict the Y, the macro finds interactions between all the n-1 independent variables with a specific independent variable k versus y dependent; at the end the macro print n-1 rows only that contains the coefficient estimates and the tests of the n-1 interactions for each different model
- 2) a macro program that plot the means of Y with confidence intervals respect to the central means of the n-tiles of x ; useful to visualizing the shape of the relationship between y and x.
- 3) a macro program that report descriptive statistics (mean-sd or n-freq) of n variables respect to the k stratified-categories of x computing two p-values for anova and trend.
- 4) a macro program which help to manage event times data. Given x event times for each subject of different named events in the columns , the macro compute: the followup time at first event, the type of first event ,the total number of events experienced for each subject, the frequencies by different events for the first events.
